

Exercise 3.3 – Child Routes

Instructions

Complete the following:

1. Using Angular CLI, create a new Angular application under week-3 and name it <yourLastName>-child-routes
2. Recreate the Child Routes Example using your own styles and messages.
3. Requirements
 - a. Bootstrap 4 navbar
 - b. Supply your own messages and default values
 - c. Personalized styles for font colors, background colors, and placement
 - i. There is no hard-fast rule for this item, but it must have some styling added
4. Take a screenshot of the application running in a browser with working routes (you should have at least 3 images – home page, product-detail.component.ts, and seller-info.component.ts)
